KSEA Distinguished Guest Series

GPT: Transforming Science, Engineering, and Beyond

Wednesday, May 17th, 2023 (virtual)

5:30-6:30 PM (PT), 8:30-9:30 PM (ET)

[Zoom](#)

ChatGPT

In this talk, we will provide a gentle introduction to GPT, a cutting-edge AI text generation algorithm, and explore its impact on various fields such as science and engineering. We will discuss how it revolutionizes the way we work and delve into its broader social implications, shaping the future across multiple domains.

Speaker

Kangwook Lee

*Assistant Professor
University of
Wisconsin-Madison*

Host

Young-Ke Kim

*Professor
University of Chicago
KSEA President*
